WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/DE2004/001612

Box	No. I	Basis of this opinion
1.		egard to the language, this opinion has been established on the basis of the international application in the language in it was filed, unless otherwise indicated under this item.
		This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2.		egard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the d invention, this opinion has been established on the basis of:
	a. typ	pe of material
	L	a sequence listing
		table(s) related to the sequence listing
	b. for	mat of material in written format
	L	in computer readable form
	c. tin	ne of filing/furnishing
	Ļ	contained in the international application as filed.
	Ļ	filed together with the international application in computer readable form.
	L	furnished subsequently to this Authority for the purposes of search.
3.		In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4.	Additi	onal comments:

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/DE2004/001612

Box No.	11	Priority
1.	Con	following document has not yet been furnished: copy of the earlier application whose priority has been claimed (Rules 43bis.1 and 66.7(a)). translation of the earlier application whose priority has been claimed (Rules 43bis.1 and 66.7(b)). sequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been blished on the assumption that the relevant date is the claimed priority date.
2.	inva	opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found lid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is sidered to be the relevant date.
3. Addit	tional	observations, if necessary:

WRITTEN ACTION

International File No.

OF THE INTERNATIONAL

SEARCH AUTHORITY (SUPPLEMENT)

PCT/DE2004/001612

Re: Section V.

- In the present action, reference is made to the following document: does not meet the requirements of Article 33(1) PCT, because the subject matter of Claim 1 la D1 : WO 03/042007 A
- The present application cks novelty under Article 33
 (2) PCT.
- 2.1 Document D1 discloses (the parenthetical references
 relate to this document):

A device for determining the instant a vehicle makes contact with an impact object (see Dl, page 2, line 28 through page 3, line 2), the device being configured to determine the instant of contact by approximating a signal derived from an acceleration signal using a function (see Dl, page 4, lines 13 through 17).

3. The dependent Claims 2,3,6,7,8 do not include any features which, when combined with the features of any claim to which they relate, satisfy the requirements of the PCT with regard to novelty and inventive step.

The reasons for this are as follows:

- 3.1 The technical feature of Claim 2
 "... that the device for producing the signal integrates the acceleration signal once or twice" is disclosed in D1 (page 4, lines 4 through 11).
 Therefore, the subject matter of Claim 2 lacks novelty under Article 33(2) PCT.
- 3.2 The technical feature of Claim 3

 "... that the device additionally takes an impact velocity into account when determining the instant of contact" is disclosed in Dl (page 4, lines 19 through 27). Therefore, the subject matter of Claim 3 lacks novelty under Article 33(2) PCT.
